

ECOsalt™ for Above Ground Pools

The above ground pool sanitizer
that's really worth its salt.

balboadirect.com

ECOsalt Sanitizer System

- No more hassles storing/handling packaged chlorine
- Mildly salted water passes through the cell and chlorinates water naturally
- Nonirritating to skin and eyes
- Fully automated control system
- Inexpensive and easy to operate

ECOsalt was developed in Australia in 1976, and today over 90% of all pool owners there use a salt system to purify their pools. As mildly salted water passes through the electronic ECOsalt cell, it's converted into a natural sanitizer that purifies your water.

ECOsalt Options

Model Number	Cell Output
BMSC13	13 gm/hr
BMSC20	20 gm/hr
BMSC26	26 gm/hr

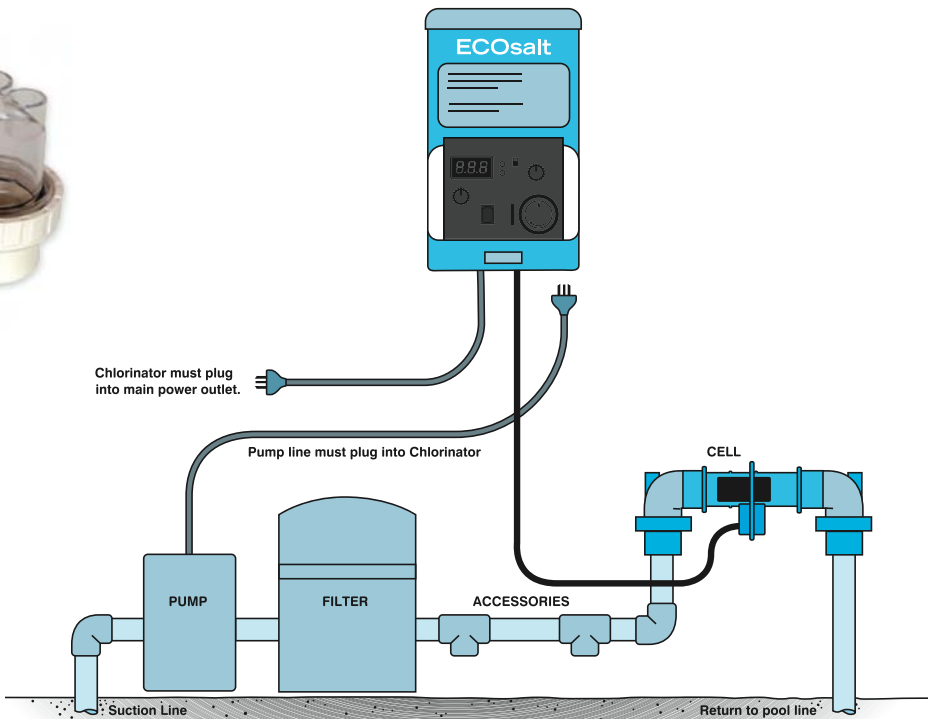

(available in 110v only)

Purify your above ground pool naturally.

If you enjoy swimming, but hate the irritating effects of packaged chlorine, join more than 350,000 pool and spa owners around the world who use salt systems to produce crystal clear, purified water free of viruses, bacteria and algae – without using any packaged chlorine, harsh chemicals or shock treatments. The revolutionary ECOsalt system temporarily transforms mildly salted water (one-tenth the salt concentration of sea water) into a natural chlorine solution that completely sanitizes your water. It's free of chemical smells, free of chemical tastes, and free of chemical irritation. And best of all, you will have peace-of-mind with a nontoxic, bacteria-free pool that's completely eco-friendly.

Key ECOsalt features

- ▶ Electrolytic cell overload protection
- ▶ Low salt level, flow and overload indicators
- ▶ Battery backup automatic time clock
- ▶ Compact rust-free aluminum and UV resistant plastic enclosure
- ▶ Self-cleaning high flow rate electrolytic cell with unions for easy maintenance
