# Variable Speed Pump

The True Variable Speed Pump and intelligent controller allows for a smooth pulse mode and infinite choices for total control of the user's hydrotherapy experience. The experience can range from a gentle fingertip to a vigorous massage.

The True Variable Speed Pump is designed for the demanding requirements of the luxury whirlpool tub market where both quietness and high performance are essential. It is the quietest on the market, and maximizes the flow rate capabilities leading to a unique, relaxing and luxurious spa experience.

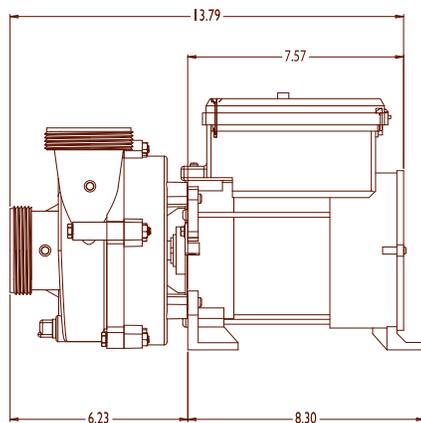

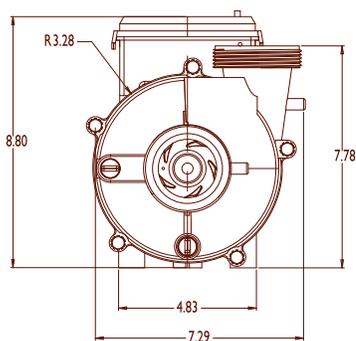

Balboa Water Group is proud to introduce the True Variable Speed Spa Pump, an innovative new product, designed for the ultimate individualized spa experience.

**Clean up the bar top!** With the Variable Speed Pump, there is no more need for air controls and valves to control the jets. The Variable Speed Pump offers all the adjustments in the controller, allowing for a new sleek design of the spa.

**Customize your spa experience:** Each person can reap the benefits of a hot water immersion, and hydrotherapeutic massage. Adjust the intensity of the massage to the individual desires of each user with the push of a button. The Variable Speed Pump is the perfect answer for those with joint disabilities, there is no more twisting and turning of jet faces and controls in order to increase or decrease the jet action, a simple push of a button will help to ease their pain.

Plumbing configuration affects pump performance. Engineering consultation is available to find the best pump for all your bath needs.
