The Clear Choice for Residential Salt Chlorination

ecomatic.com

ECOmatic Saltwater Chlorinators

- No more chlorine price increases
- No hassles or dangers of storing packaged chlorine
- Naturally destroys germs, viruses, bacteria and chloramines
- Easy to install, inspect and maintain
- Higher chlorine output
- Cannot be over-salted

ECOmatic™ for Inground Pool Salt Solutions

ECOMATIC is a safe and eco-friendly solution that means no more eye and skin irritation.

ECOMATIC Options

Model	Chlorine Output
ESC 16	14 gm/hr
ESC 24	22 gm/hr
ESC 36*	32 gm/hr
ESC 48	40 gm/hr

* pH/ORP capabilities

Choose ECOMatic and trust the water chemistry experts

With more than 350,000 units installed worldwide, ECOMatic saltwater chlorinators are the crystal clear choice for water quality management. ECOMatic was developed in Australia in 1976, and today over 90% of pool owners there use salt systems to purify their pools.

ECOMATIC is an inexpensive, automated control system with a self-cleaning, high flow electrolytic cell that comes with overload protection. It is easy to install, maintain and operate, and comes with a compact and corrosion-free aluminum and plastic enclosure. The ESC 36 model also monitors pool chemistry via pH/ORP sensors. When the system is operating, these sensors monitor and adjust the pH (with the optional acid feed tank) and chlorine levels to customer specified levels.

Whether for a new pool installation or a retrofit solution, saltwater chlorinators are the leading request from consumers around the nation. And we can handle pools up to 60,000 gallons. So go with the right choice for your customers. Choose the ECOMatic residential salt chlorinator.

Why salt?

- ▶ No more eye and skin irritation
- ▶ No more chlorine price increases
- ▶ No hassles or dangers of storing packaged chlorine
- ▶ Safe and eco-friendly— $\frac{1}{3}$ as salty as human tears
- ▶ Naturally destroy germs, viruses, bacteria and chloramines
- ▶ Inexpensive and easy to operate

Why ECOMatic?

- ▶ Easy to install, inspect and maintain
- ▶ Higher chlorine output
- ▶ High flow cell (125gpm)
- ▶ Self-diagnostic display
- ▶ Clear housing and removable cell for easy visual inspection and maintenance
- ▶ Salt-and-go start-up; no need to wait for salt to dissolve before turning system on
- ▶ Cannot be over-salted
- ▶ Self-cleaning cell via reverse polarity
- ▶ Corrosion-proof power pack with aluminum heat sink
- ▶ 2" plumbing connections
- ▶ Compact 8" plumbing footprint
- ▶ No mechanical flow switch
- ▶ No unions means reduced leak potential
- ▶ Sizes for pools up to 60,000 gallons
- ▶ 5-year limited warranty on cell and power pack
