

# BathHeaters

Super Quiet Soaker Tub Heating System

- Energy efficient
- Plugs into standard 120V outlet
- Maintain constant bath temperature
- Automatic reset for perfect temperature control
- Pre-plumbed for easy installation and serviceability

Made in the USA

**BALBOA**  
water group

## Luxury

Mixing air and water in a jetted bath causes the water to cool 75% faster than in a traditional bathtub. But, a Balboa bath heater eliminates the rapid cooling of the water by providing a constant temperature – between 102° F and 104° F – for a longer, more luxurious, and more enjoyable bath.

## Automatic Reset

Only Balboa heater features the automatic reset for perfect temperature control without having to locate and reset the unit itself under the tub. Installation of a our bath heater couldn't be simpler and is perfect for both new installations as well as a retrofit.

### Tee Heater

935211-2X
